## AMENDMENTS TO THE SPECIFICATION

Please amend the abstract as follows:

-- A retractable camera apparatus is disclosed. Through the use of the apparatus in accordance with the present invention, a video teleconference environment can communicate, in real time, such personal features as gesture, expression and body language. The apparatus includes a housing portion, at least one arm portion coupled to the housing portion wherein the at least one arm portion is capable of being moved between a retracted position and a deployed position and at least one a plurality of cameras coupled to the at least one arm portion --
